

THINK OUTSIDE THE BEAN

Coffee Leaf Tea

- Coffee Leaf Tea has a lightly sweet, earthy taste with a rich mouthfeel and little to no bitterness in the aftertaste. It is equally enjoyed hot and cold. Most consumers prefer to drink it unsweetened as it doesn't need sugar or milk to be consumed.
- Low caffeine yet provides a light, holistic lift similar to green tea without jitters or crash

Mission & Story

- Our mission is to improve the livelihoods of coffee communities by harvesting a tasty, healthy, and sustainable product.
- Max and Arnaud reinvented a centuries-old tradition from Ethiopia and developed the new recipe of Coffee Leaf Tea on the farm in Nicaragua.

Social Impact & Goals

Coffee farms are only profitable during the bean harvest season, which is only 3-4 months long. 80-90% of the workers are seasonal and seek work elsewhere during the off-season, creating a very volatile economy.

Achievements

- Winner of the 2015 Best New Product Award at the World Tea Awards, nominated for Best Tea Industry Innovator
- First to innovate the centuries-old tradition of Coffee Leaf Tea with entirely new methods, first to produce and commercialize Coffee Leaf Tea globally
- Customers in over 35 countries
