

NEW

MagTherapy MAGNESIUM CHLORIDE BALM

A RICH, MINERAL-INFUSED SKIN BALM

RELIEVES TENSION AND
REPLENISHES MAGNESIUM
WHILE SEALING IN MOISTURE

SKIN-SOFTENING TENSION RELIEF

The latest addition to our MagTherapy line of products, NEW Magnesium Balm improves skin while delivering fast-acting transdermal magnesium.

MagTherapy is made with magnesium chloride in its most natural state, with over 90 other trace minerals not found in lab-produced magnesium chloride.

Combined with natural coconut oil, raw shea butter and beeswax, it's our richest formulation.

MAGTHERAPY BALM:

- Penetrates through the skin to relieve tension better than Epsom salts
- Helps restore healthy magnesium levels
- Soothes, protects and boosts skin's moisture retention

Use it anywhere for softer skin or rub MagTherapy Balm into areas of muscle pain and tension.

Contains approximately 200 mg of seawater-source magnesium chloride per teaspoon. Tested and certified free from heavy metals and contaminants.
