- 5 Carbon Sugar
- Natural
- Low Glycemic Index
- Bulk Sweetener

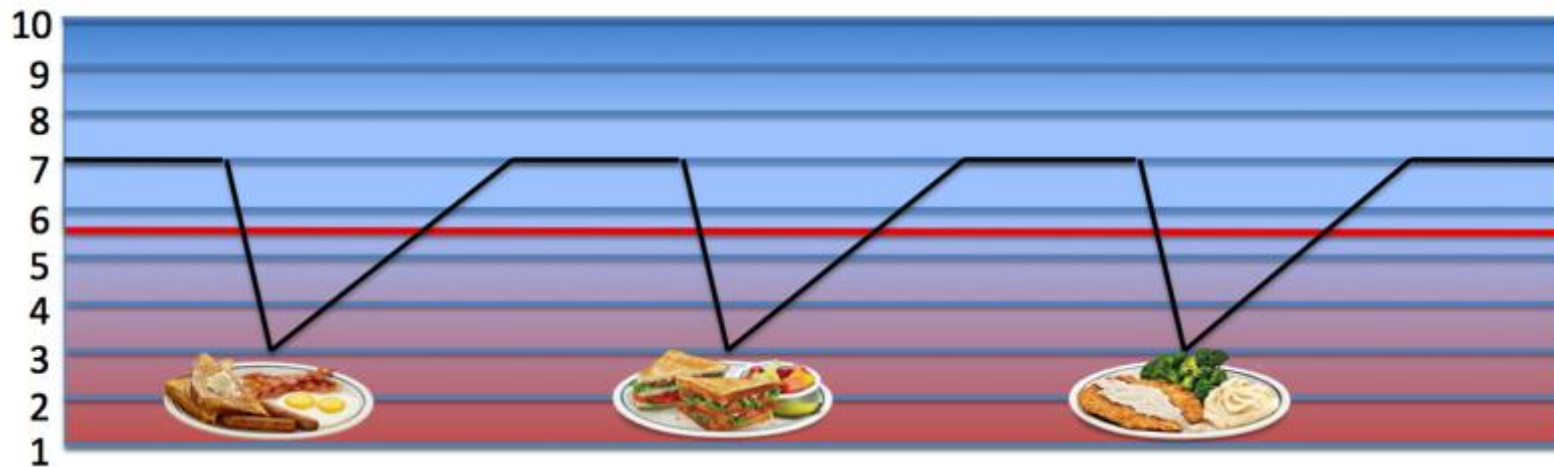

DENTAL DEFENSE  
***Spry***®

# Decay Process

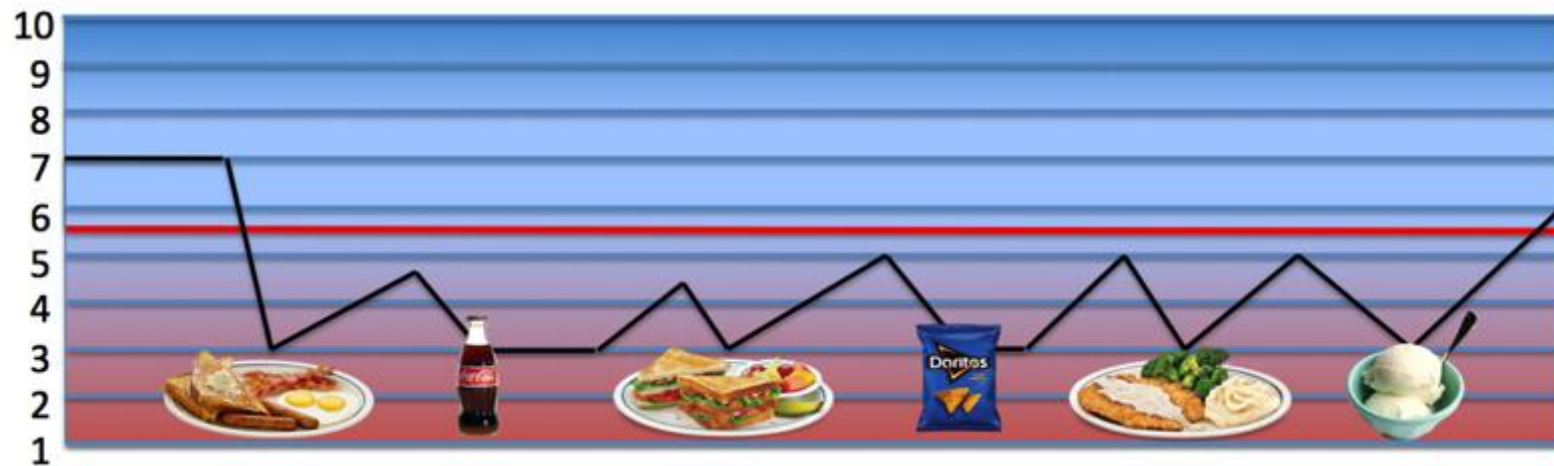

# Habits and Decay

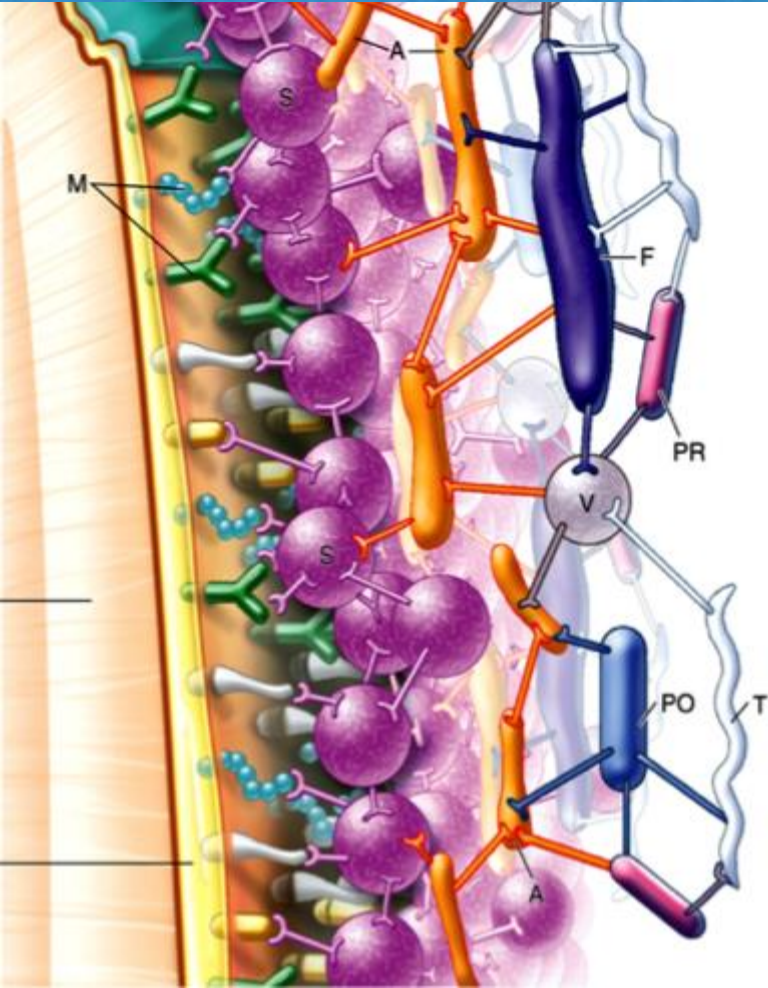

Historic Diet

Modern Diet

# Xylitol and Oral Health

- **Anti-Adhesive** – Reduces adhesion of bacteria and bio film to the teeth and oral tissues
- **Non-Fermentable** – Bacteria are unable to “feed on” the xylitol
- **Hyper-Osmotic** – Increases natural saliva production which flushes out bacteria and helps with re-mineralization

# Decay Happens All Day

# Why Spry?

- Natural
- Non-GMO
- Sugar Free
- Aspartame Free

# Toothpastes

## Xylitol

A five carbon sugar alcohol that reduces cavity producing bacteria on the teeth. As part of Spry's commitment to quality xylitol products, pharmaceutical grade xylitol is used in production.

## Aloe Vera

Natural moisturizer. Helps sore gums.

## Fluoride

Helps prevent tooth decay.

## Cranberry

Helps reduce plaque by preventing sugar dependent biofilm from forming on teeth. Naturally, anti-tartar.

# Healing Blend

Green  
Color:  
Neem and  
Seaweed

## CoQ10

Reduces collagen and tissue destruction of the gums (gum disease).

## Sage

Speeds healing of a sore mouth or bleeding gums.

## Chamomile

Naturally anti-inflammatory and antiseptic which helps reduce canker sores.

## Myrrh

Aids in wound healing and has strong, natural antiseptic qualities.

## Thyme

Acts as a natural anti-inflammatory for inflamed gums.

# Anti-Plaque

Purple  
Color:  
Neem and  
Eggplant

## Tea Tree

Helps reduce plaque by fighting microorganisms.

## Cranberry

Helps reduce plaque by preventing sugar dependent biofilm from forming on teeth.

## Olive Leaf

Olive leaf contains oleuropein, an anti-bacterial compound that stops 'gram negative' bacteria on teeth.

## Xylitol

Helps reduce cavity producing bacteria on the teeth. As part of Spry's commitment to quality xylitol products, pharmaceutical grade xylitol is used in production.

# Fresh Breath

Blue Color:  
Neem and  
Eggplant

## Sodium Bicarbonate

Neutralizes acids that stick to teeth and gums causing bad breath.

## Zinc

Fights mouth odor by reducing volatile sulfur compounds produced in the oral cavity.

## Chamomile

Naturally anti-inflammatory and antiseptic which helps reduce bad breath.

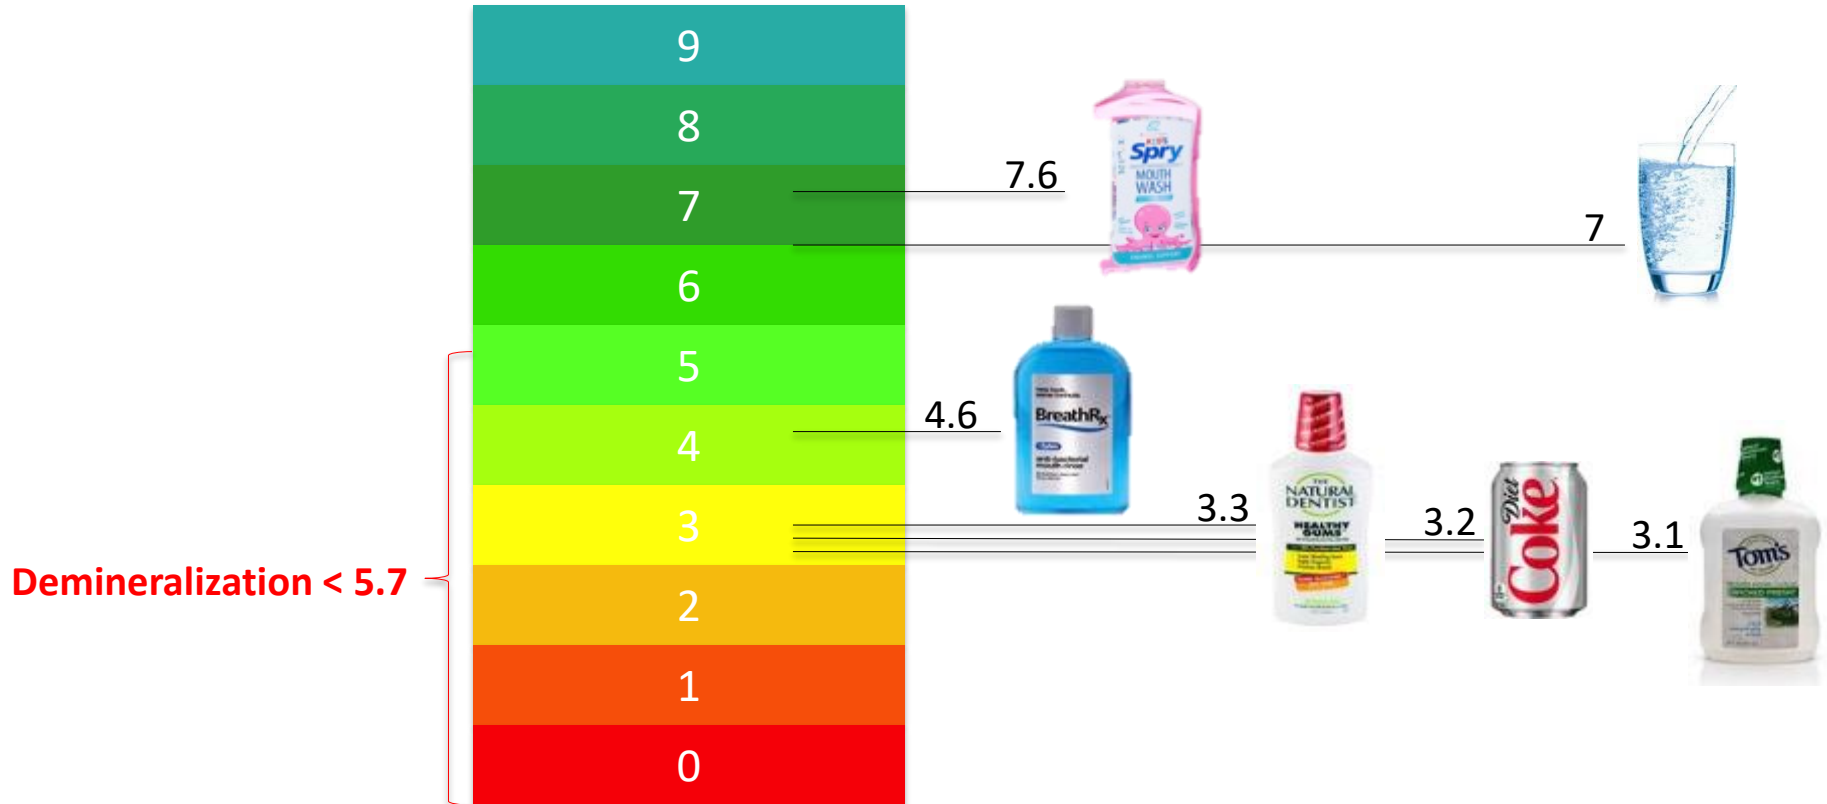

## Xylitol

Helps reduce cavity producing bacteria on the teeth. As part of Spry's commitment to quality xylitol products, pharmaceutical grade xylitol is used in production.

# pH Matters

## Baby

## Toddler

## Child

# Fresh Breath

## Xylitol

Helps reduce cavity producing bacteria on the teeth.

## Cranberry

Natural anti-microbial properties

## Aloe

Moisturizing and soothing to the gums

## Zinc

Reduces odors through anti-microbial properties

# Kid's Enamel Support

Pink Color:  
Neem and  
Eggplant

## Calcium Glycerophosphate

Supports strong tooth development.

## Echinacea

Naturally anti-microbial, Echinacea helps reduce mouth infections.

## Chamomile

Naturally anti-inflammatory and antiseptic which helps reduce canker sores.

## Xylitol

A five carbon sugar alcohol that reduces cavity producing bacteria on the teeth. As part of Spry's commitment to quality xylitol products, pharmaceutical grade xylitol is used in production.

# Xlear Difference

- Only sinus care products with xylitol
- When exposed to xylitol, bacteria lose their ability to adhere to nasal passages
- Better moisturizing and soothing than saline solutions alone
- Safe for long-term use – Non addictive and no rebound effect
- Can be used during pregnancy or nursing
- Won't cause interaction with other medications
- Natural, PATENTED formula - #1 in Health Food channel in US & Canada
