

Keep Your Family's Immunity Strong

Sequence Colostrum is the perfect supplement for the whole family! It contains growth factors that can decrease gut permeability and increase gut protein synthesis.

Colostrum contains immune factors that enhances the natural resistance to upper respiratory infections, supports immune function and protects intestinal mucosal lining from bacteria.

Colostrum Boosts Immunity

Colostrum is the only natural source of life-supporting immune & growth factors that help fight disease, repair tissue & increase energy. Bovine colostrum is much richer in growth factors than humans.

Our Calves Come First

Dairy cows produce an abundance of colostrum – more than enough to supply human needs without depriving newborn calves. Sequence Colostrum uses only the first milking which has the highest concentration of beneficial immune & growth factors.

6

Time Of Collection Matters

Collected just 6 hours after birth (colostrum rapidly degrades after birth, even collected just 24 hours after birth, it contains only 25% of the immune & growth factors).

We Care About Our Cows

Sourced from grade A, USDA Certified dairy cows from small, family run farms in Wisconsin (the colder the climate, the higher the concentration of immune factors).

Tested For Impurities

No growth or milk production hormones are ever given to pregnant cows, & all colostrum batches are tested & certified to be free of bacteria, heavy metals, nitrates & pesticides.

DID YOU KNOW?

How does Colostrum work and why should I take it?

As we age, our bodies gradually produce less of the immune and growth factors that help fight disease, repair body tissue and promote energy and vitality. Colostrum is the only natural source of these life-supporting immune and growth factors. Sequence Colostrum's growth factors help to support cellular growth and repair tissue which fights the effects of aging. Colostrum also supports muscle growth, burns body fat and enhances muscle recovery post-exercise.
