

# OUR PROBIOTIC WATER !

RAW • ORGANIC • VEGAN

PROBIOTICS

A probiotic is by definition a living microorganism with beneficial effects on human health.

VEGAN

Contains 1 billion vegan probiotics, for a healthy gut flora and immune system.

ORGANIC

Organic produce is grown without the use of pesticides, synthetic fertiliser, sewage sludge or genetically modified organisms.

HPP

High pressure processing is a technique that blasts our juices with pressure that's six times stronger than the pressure found at the deepest point in ocean. This pasteurization keeps bacteria out while leaving nutrients intact. It lets us lock in as much fresh taste and goodness from our fruits and veggies as possible.

TASTE

Lively and fruity, this product is a delicious way to get your daily dose of probiotics on the go.

RAW

This all happens below 4 °C, so our products remains entirely raw.

### PINEAPPLE / MINT PROBIOTIC

#### NUTRITIVE FACTS ( 354 ml )

calories .....	50	dietary fibres .....	0 g
total fat .....	0 g	sugars .....	11 g
saturated fat .....	0 g	protein .....	0,4 g
trans fat .....	0 g	vitamin A .....	2 %
cholesterol .....	0 mg	vitamin C .....	30 %
