

Pop that's good for you.

Taking **magnesium** is a big favour to your body. And now, there's a refreshingly fun, fizzy way to get it. Introducing **MagPop!**, a new magnesium infused effervescent drink that dispenses an ample dose of **magnesium glycinate**, **vitamin C** and **electrolytes** with every serving. All you have to do is add water, watch the fizz and enjoy!

MagPop!

Fun tangy **fizz** with
the magnesium your
body needs!

Used by the whole body.

Magnesium is used by every cell in the body, from crafting new proteins to rebuilding bones, relaxing muscles and relaxing the mind, and powering every cell action and 350 enzymatic reactions.

The best kind of magnesium.

Our magnesium is bound to the amino acid L-glycine for the best bioavailability for your body. Because it can be absorbed directly through the intestinal walls, magnesium glycinate is absorbed faster and at a higher rate than other forms like magnesium oxide and magnesium citrate.

Fizzes in your glass, not in your tummy.

Magnesium glycinate is easy on the bowels and doesn't react to stomach acid, so you can take a break from bathroom breaks.

Enjoy what's in it and what's not.

Quench your thirst with pure **magnesium**, **vitamin C** and **electrolytes** without any added sugar, artificial colours or flavours.

100mg
Magnesium (from glycinate)

325mg
Vitamin C

NON MEDICINAL INGREDIENTS

citric acid, tartaric acid, sodium bicarbonate,* calcium carbonate,* potassium carbonate,* stevia, xylitol, maltodextrin, quercetin, beta-carotene, orange juice powder, natural orange flavour. *Provides electrolytes.
