

Elderberry Cough Syrup (Adult and Kids)

All-in-one cold and flu relief that makes this more than just Cough Syrup

A unique, all-natural cough syrup formula made with fresh Elderberry and Wild Cherry Bark blended with honey and essential oils

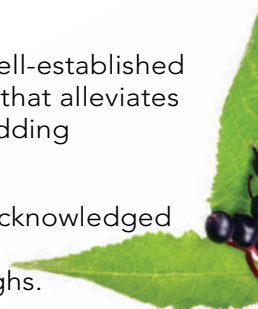

For sufferers of cold and flu:

- Who have tried tackling their general symptoms (e.g. tickle in the throat, fever, general malaise) with our EchinaSeal® or EchinAce® without success
- Who want a natural cough remedy that coats and soothes the throat
- Looking for great-tasting relief from other symptoms of colds and flu:
 - Runny nose and nasal congestion
 - Sore throat
 - Headache and fever
 - Pains and chills
 - Excess phlegm
 - Sneezing
- Who want a companion product to RespiraCleanse® in the form of a syrup

How it works

- Featuring **elderberry**, a classic antiviral and antibacterial, rich in flavonoid compounds
- With **wild cherry bark**, used over the ages by many indigenous peoples for its anti-inflammatory properties
- Includes **marshmallow**, an effective herb for soothing mucous surfaces such as inflamed and irritated bronchial passages.
- A formula supplemented by **essential oils of lemon peel** and **cinnamon bark**
- With a foundation of **honey**, a well-established anti-infective, antioxidant agent that alleviates inflamed membranes, besides adding sweetness and taste
- Adult version has **lobelia**, long acknowledged as a calming agent that soothes the spasms associated with coughs.

Why natural?

Studies show that pharmaceutical cough syrups do not outperform the rich storehouse of nature. Drawing upon nature's healing power, St. Francis Herb Farm is proud to introduce an all-natural, certified organic cough syrup.

Elderberry Cough Syrup (Adult and Kids)

What's the difference?

- Kids version formulated to be gentler.
- **Lobelia** removed in kids version and replaced with **thyme**, **catnip**, and **anise**, gentler herbs chosen not only for their excellent flavour profiles, ideal for a younger age group, but for their medicinal qualities. **Thyme** has antibacterial properties, while anise calms and soothes and **catnip** is fever-reducing.
- Kids version also has slightly more honey.

Elderberry Cough Syrup (Adult and Kids)

is non-GMO, certified organic, dairy-free, and gluten-free.
